

Changing hormones, but same healthy smile.

Women's oral health: What you should know.

Women's hormones make them more susceptible to dental issues at certain times. That's why it's important to be diligent about oral health all the time.

Puberty*

Puberty increases estrogen and progesterone and can cause:

- Red, sensitive or bleeding gums

Monthly menstrual cycle*

Periods increase progesterone and can cause:

- Red, sensitive or bleeding gums
- Swollen salivary glands
- Canker sores

Birth control*

Some forms of birth control increase progesterone and can cause:

- Red, sensitive or bleeding gums
- Pain or stiffness in the jaw known as TMJ disorder

Pregnancy*

Pregnancy increases progesterone and can cause:

- Gingivitis
- Red, swollen, bleeding gums

Menopause*

In addition to experiencing fluctuating hormones, menopause-aged women often take medications that can cause:

- Red, sensitive or bleeding gums
- Dry mouth
- Tooth decay

Stick to a good dental health routine*

- Floss at least once a day, and brush your teeth at least twice daily with a toothpaste containing fluoride
- Eat healthy, and limit sugars and starches
- Visit your dentist twice a year for a routine cleaning
